

Hello.

Beautiful? I don't see myself like beautiful anymore they mess up my face "

After you had a problem with eye, now I join to you too. Ok. here is what happened.

They harass me so much I couldn't take it anymore, and I flood out my cell again, This time I didn't cuff out, so that's why they skit up and came with the team of Like 7 people, First they spray the pepper spray, Left me in the cell for couple minutes I couldn't take a breath, ~~my hands~~ I try to take breath from under the door, LT spray that thing right on my face, than I put my hand out so they could handcuff me, they handcuffed me, I fell down my hands are on my back with the cuffs, then those people came into my cell. when I was like half dead no moving at all they jump on me so badly one of them stick his finger to my right eye (its swollen right now full of blood) after the same person start sayin "you... muslim, terrorist" and kick my head (I have a concussion right now, they won't let me go to ER), until they put the cuffs to my leg ~~then~~ I pass out from pain, then I woke up when one of them twist my hand and heard one of them saying "we have to take him out walking" they took

me out... the end? no! horror just started...  
put me in that chair with the spray all over  
my face and hands, left me for 2 and half  
hours in one room. I was crying and asking for  
help with my eye (literally burning with the pain)  
Ruthless human beings, I thought I am about  
to die, Fortunately for me it was not my time.  
I survived with a lots of pain. No Justice in  
this place, inmates are rats and COs support them.  
If they will have an argument with me they  
play national anthem of US, by the way  
when they came to get me in their suits.  
they played the national anthem of USA.  
it is so awful, They are pulling USA down.  
Was really really bad. FBI was much softer  
when they came to my apartment, Even  
though they didn't spray or they didn't  
had a camera view from inside, they did  
100 times better job. Now those COs they  
had camera view and I was in the small  
cell with no weapons or any dangerous thing  
and on top of that I was already handcuffed  
they still bit the heck out of me. I could  
hear and now I see they really really  
enjoyed this awful terror which they did against  
me.

Hopisfully you don't dream no more black  
horses, because you know what I mean.

I wish I was in a good mood to write  
down about me things you asked. Maybe  
next time when I feel better.

Now please take care yourself. talk to you  
soon.

allaah
